Appln. S.N. 10/800,574 Amdt. dated May 16, 2012 Reply to Office Action of February 16, 2012 Docket No. 82186688 Page 2 of 12

## In the specification:

Please revise the paragraph beginning at page 1, line 5 of the application as follows:

The present patent application is related to U. S. Patent Application No. 10/800, 533, now abandoned, [[ ]](Client Docket No.: 200315755, Attorney Docket No. 1683.073USI), to Vanessa Chinea, entitled "Pharmaceutical Vehicle" filed on March 15, 2004, which is assigned to the assignee of the present patent application.

Please revise the paragraph beginning at page 8, line 28 as follows:

In one embodiment, the residue or particles that remain on the substrate after evaporation are edible and/or ingestible. In an additional embodiment, the vehicle used in transporting the active ingredient through the fluid ejection device is at least one of Generally Regarded as Safe, edible, ingestible, used in the pharmaceutical industry, and approved by the FDA. In one embodiment, each vehicle used in the solution has a low toxicity as listed in the ICH Topic Q3C Impurities: Residual Solvents (1997) at
